INTRODUCTION

During the 1966 fiscal year approximately 1050 projects were approved in Ohio schools under Title I of the Elementary and Secondary Education Act of 1965. The nature of these projects shows many commonalities as well as many differences.

School personnel involved in project development have indicated a desire to know the kinds of projects that have been implemented so that a dialogue can be established between and among school districts for the purpose of sharing information about effective educational programming.

A list of the 1966 projects has been prepared according to (1) descriptive title, (2) grade levels involved, and (3) time of project (regular school year, summer school or both). The listing is categorized by the county in which the project took place.

It is hoped you will find the attached listing of projects both informative and helpful.
